SECURE COMMUNICATIONS READINESS SUMMARY

Kaymera

Kaymera Encrypted Communications

ISSUE	DEPLOYMENT 00
CADENCE	PER DEPLOYMENT
HANDLING	CLIENT CONFIDENTIAL

BOTTOM LINE UP FRONT

The client's 40-person executive and deal team is now on encrypted communications. 32 hardened devices were provisioned and 8 personal phones run the secure app. Encryption covers all calls and messages; two travelers to high-risk regions received additional device controls.

COMMUNICATIONS POSTURE

2 / 5

GUARDED

LOW — CRITICAL

Scored on TAM-C's 1 to 5 risk method. Down from High before deployment on unprotected phones.

01 Deployment status

PROVISIONING — MODERATE

Hardened devices issued to leadership

Thirty-two tamper-proof devices were configured by [redacted] and handed over in person in London and Geneva. Each user completed a 30-minute onboarding and passed a verified secure call before go-live.

SOURCE · DEPLOYMENT TEAM

THREAT POSTURE — HIGH

Spyware link blocked on a device

A device used by a deal lead received an SMS link tied to known [redacted] spyware infrastructure. The link was blocked on tap and the device showed no sign of compromise on forensic check.

SOURCE · DEVICE TELEMETRY

TRAVEL — ELEVATED

Travel profiles for high-risk trips

Two executives traveling to the Gulf received devices with locked-down profiles, disabled cloud backup and auto-wipe on tamper. A [redacted] hotel network flagged during the trip was avoided.

SOURCE · SECURITY TEAM

02 Readiness checklist

CONTROL	TREND	RISK
Legacy messaging apps still in team use	▼ Easing	ELEVATED
Personal phones pending secure app setup	▼ Easing	MODERATE
Targeted phishing and spyware attempts	▲ Rising	HIGH
Devices missing latest security update	■ Steady	MODERATE

03 Next steps

01 Retire legacy messaging apps for deal discussions and enforce the secure app by policy.

02 Complete secure app setup on the remaining personal phones within two weeks.

03 Schedule a quarterly device health review and refresher briefing for all users.

TRAFFIC NOW ENCRYPTED

Messaging 48% · Voice calls 37% · File share 15%

WHAT THE CLIENT RECEIVES

→ Encrypted tamper-proof devices
→ Secure app for existing phones
→ End-to-end encrypted calls and files
→ Onboarding and ongoing support
