

INTELLIGENCE CENTRAL

CYBER THREAT HUNTING A SOC SOLUTION

Do you have a real SOC?

Meet TAM-C C4I™

The choice of the world leading CISOs

In a world where hackers have become more organized and sophisticated, cyber attacks are expanding and the amount of information needed for security solutions in an organization is increasing and greater expertise is needed.

- Do you know who is scanning and trying to attack the organization's network from the outside?
- Are you following further attempts by these threats?

COMMAND, CONTROL, COMMUNICATIONS, COORDINATION & INTELLIGENCE acts as a canopy and early warning to the client's infrastructure to alert of potential and ongoing cyber threats, while adapting to the evolving adversary landscape and understanding adversary capabilities.

Using sophisticated processes and optimized rules the identification of unusual, and anomalous activities in the clients infrastructure help proactively identify and detect potential threats.

Designed to meet duty of care requirements:

- Ensure the safety of IT assets and information.
- Develop robust and detailed information requirements
- Multilayers of information collection.
- Identify and assess threats internally and externally
- Tactical monitoring formulas

Through our Managed Detection and Response (MDR) experts, our clients obtain the advantage of the TAM-C knowledge-base and cyber threat services, without being bound to a specific set of products.

Black Mirror Program

AI and ML platforms to identify corporate and personal Identifying Information. Comprehensive monitoring of exploitable physical and cyber vulnerabilities by adversary attack vectors

TAM-C Cyber SOC solution utilizes advanced AI-based protection and skilled security professionals in order to achieve a 24/7 alerting, detection and response mechanisms
